Note: In 2013, the FBI UCR Program began to collect rape data using a revised definition. The UCR Program defines rape as "penetration, no matter how slight of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim." The definition includes offenses of rape, sodomy, and sexual assault with an object.

"NA" means that data were provided in original UCR table
